1. Dashboard Overview

Welcome to the Admin Dashboard! This comprehensive guide will help you understand and use all features available in your dashboard.

The Admin Dashboard provides complete control over the Leave & Attendance Management System. You can manage users, policies, applications, reports, and system settings.

2. Navigation

The sidebar menu on the left provides quick access to all dashboard features:

- Dashboard - Overview and statistics
- User Management - Add, edit, and manage users
- Leave Policies - Create and manage leave policies
- Leave Applications - Review and approve leave requests
- WFH Management - Manage Work From Home registrations
- Reports - Generate various reports

- User Logs - View system activity logs
- Attendance Time Settings - Configure check-in/check-out times
- Feedback Management - View and respond to employee feedback
- Settings - Configure your account preferences

3. Key Features

Detailed explanation of each feature:

User Management

- View all users (employees, managers, admins)
- Add new users with complete profile information
- Edit user details and permissions
- Activate/deactivate user accounts
- Search and filter users by department, status, etc.

Leave Policies

- Create multiple leave types (Sick, Casual, Annual, etc.)
- Set leave limits and accrual rules
- Configure approval workflows
- Manage policy assignments by department

Leave Applications

- View all pending leave applications
- Approve or reject leave requests
- Add comments and feedback
- Filter by status, date, department
- View application history

WFH Management

- View all Work From Home registrations
- Verify employee WFH addresses
- Review WFH update requests
- Monitor location spoofing alerts
- Deactivate WFH registrations

Reports

• Generate attendance reports •
Create leave utilization reports •
Export data in multiple formats •
Schedule automated reports •
View historical data

4. Step-by-Step Guides

Common workflows:

Adding a New User

1. Navigate to User Management
2. Click "Add New User" button
3. Fill in all required fields (name, email, department, role)
4. Set user type (Employee, Manager, or Admin)
5. Click "Save" to create the user
6. User will receive email verification link

Creating a Leave Policy

1. Go to Leave Policies section
2. Click "Create New Policy"
3. Enter policy name and description
4. Set leave limits (days per year)
5. Configure accrual rules
6. Assign to departments
7. Save the policy

Approving Leave Applications

1. Navigate to Leave Applications
2. Review pending applications
3. Click on an application to view details
4. Check employee leave balance
5. Click "Approve" or "Reject"
6. Add comments if needed
7. Confirm your decision

5. Tips & Best Practices

- Always log out when done using the system
- Keep your profile information up to date
- Check notifications regularly
- Use search and filters to find information quickly
- Review your settings and preferences periodically
- Contact support if you encounter issues

6. Troubleshooting

Common issues and solutions:

- Can't log in: Check your credentials or contact IT support
- Location not detected: Allow location permission in browser settings
- PDF won't download: Check your browser download settings
- Page not loading: Clear browser cache and reload
- Features not working: Try logging out and back in

7. Keyboard Shortcuts

While most navigation is done through the sidebar menu, here are some helpful shortcuts:

- Ctrl/Cmd + K: Search (if available)
- Ctrl/Cmd + R: Refresh page
- Esc: Close modals/dialogs
- Tab: Navigate between form fields

8. Support & Contact

If you need additional help or have questions:

- Check the Settings page for more resources
- Contact your system administrator
- Submit feedback through the Feedback section
- Review system notifications for updates

For technical issues, please contact your IT support team with:
- Your user type: admin
- Description of the issue
- Screenshots if possible
- Steps to reproduce the problem
